Unit 5 Control in Cells & Organisms Homeostasis & Negative

Homeostasis [back to top] Homeostasis literally means 'same state' and it refers to the process of keeping the internal body environment in a steady state. The importance of this cannot be over-stressed, and a great deal of the hormone system and autonomic nervous system is dedicated to homeostasis.

BiologyMad A-Level Biology

Regulating blood glucose. Glucose is needed by cells for respiration. It is important that the concentration of glucose in the blood is maintained at a constant level and controlled carefully. Insulin

animal coordination, control and homeostasis - Revision

There are four main topics in this unit, excretion (including the kidney), nervous coordination, chemical coordination and plant communication. Some teachers prefer to teach it in the syllabus order. Others like to begin with the nervous system as it may be more familiar and can lead to a more detailed consideration of nervous transmission.
