Casual for a Cause Registration Form Complete | Alzheimer

Alzheimer's Disease. Alzheimer's disease is the most common form of dementia. And it's worth noting that dementia isn't itself a disease but rather an overarching way of describing memory loss due to age and various types of diseases. Between 60 and 80 percent of people with dementia have Alzheimer's, and it's believed the total number of seniors living with Alzheimer's in the United States is over 5.5 million.

The Non-Alzheimer's Causes Of Memory Loss | Aging.com

ALZHEIMER'S DISEASE In 2009, nearly 11 million family members and friends provided unpaid care for a person with Alzheimer's disease or another type of dementia. Many of these caregivers understandably want to keep loved ones at home as long as possible. Caring for a person with Alzheimer's disease, however, can be very demanding.

Alzheimer's disease - American Academy of Neurology

As Alzheimer's disease progresses, symptoms may include a change in sleep patterns, depression, agitation, difficulty doing basic tasks such as reading or writing, violent behavior and poor judgment. People with severe Alzheimer's disease are unable to recognize family members or understand language.

Alzheimer's Disease - RadiologyInfo.org

Alzheimer's is a growing problem – 15% of people over age 65 are affected, and 40% of those over age 85. While much less common, Alzheimer's disease can occur in younger people as well. Although there is currently no cure for Alzheimer's, researchers are working to develop new treatments. Research has
