Social network analysis (SNA) is the process of investigating social structures through the use of networks and graph theory. It characterizes networked structures in terms of nodes (individual actors, people, or things within the network) and the ties, edges, or links (relationships or interactions) that connect them. Examples of social structures commonly visualized through social network ...

What does gap analysis mean? A simple framework for assessment Jeffrey Parrish and Nigel Dudley In a conservation context, gap analysis is a method to identify biodiversity (i.e., species, ecosystems and ecological processes) not adequately conserved within a protected area network or through other effective and long-term conservation measures<sup>1</sup>. It has developed over the past 15 years in ...
