BI-RADS is an acronym for Breast Imaging-Reporting and Data System, a quality assurance tool originally designed for use with mammography. The system is a collaborative effort of many health groups but is published and trademarked by the American College of Radiology (ACR).. The system is designed to standardize reporting, and is used by medical professionals to communicate a patient's risk of ...

BI-RADS - Wikipedia

Cysts are by far the most frequently encountered breast condition and are usually asymptomatic and found accidentally while performing an ultrasound examination.

Complex cystic breast masses in ultrasound examination

When other tests show that you might have breast cancer, you will probably need to have a biopsy. Needing a breast biopsy doesn't necessarily mean you have cancer. Most biopsy results are not cancer, but a biopsy is the only way to find out. During a biopsy, a doctor will remove cells from the ...

INTRODUCTION. The incidence of thyroid nodules has increased 2–4-fold over the past three decades, mainly due to increased use of ultrasound and advancement in ultrasound technology (1, 2). According to recent guidelines and recommendations reported by different scientific societies (3-6), ultrasound remains the most important tool in the initial evaluation of thyroid nodules since it has the ...

In medicine, ovarian vein syndrome is a rare (possibly not uncommon, certainly under-diagnosed) condition in which a dilated ovarian vein compresses the ureter (the tube that brings the urine from the kidney to the bladder). This causes chronic or colicky abdominal pain, back pain and/or pelvic pain. The pain can worsen on lying down or between ovulation and menstruation.
