A candlestick chart (also called Japanese candlestick chart) is a style of financial chart used to describe price movements of a security, derivative, or currency. Each "candlestick" typically shows one day, thus a one-month chart may show the 20 trading days as 20 "candlesticks". Shorter intervals than one day are common on computer charts, longer are possible.

The computational logic for constructing a Renko chart is used to create Renko charts in most programs like Zerodha Kite. It follows the rules set forth in the book Beyond Candlesticks. The essence of Renko charting is that each brick reveals, at various time intervals, key information on market sentiment.
