T. Ritchey: General Morphological Analysis \_\_\_\_\_ 3 The first to use the term morphology as an explicitly defined scientific method would seem to be J. W. von Goethe (1749-1832), especially in his "comparative morphology" in botany.

### **General Morphological Analysis**

In personality pathology, dimensional models of personality disorders (also known as the dimensional approach to personality disorders, dimensional classification, and dimensional assessments) conceptualize personality disorders as quantitatively rather than qualitatively different from normal personality. They consist of extreme, maladaptive levels of certain personality characteristics ...

The dimension of a vector space is the number of vectors in any basis for the space, i.e. the number of coordinates necessary to specify any vector. This notion of dimension (the cardinality of a basis) is often referred to as the Hamel dimension or algebraic dimension to distinguish it from other notions of dimension.. For the non-free case, this generalizes to the notion of the length of a ...

INTRODUCTION General Morphological Analysis (GMA) was developed by Fritz Zwicky - the Swiss astrophysicist and aerospace scientist based at the California Institute of Technology (Caltech) - as a method for structuring and investigating the total set of relationships contained in multi-dimensional, non-quantifiable, problem complexes (Zwicky 1966, 1969).

British anthropologist Mary Douglas (1973) proposed a two-dimensional ordering of ways of looking at the world: 1. "Group"™ or inclusion - the claim of groups over members, and 2. "Grid"™ or classification - the degree to which interaction is subject to rules. Douglas saw these categories as relating to a wide variety of beliefs and social actions:

Donghee Son and Zhenan Bao discuss soft and robust skin-like electronic nanosystems and review several recent reports on materials strategies and integration methodologies of stretchable and self-healable functional nanomaterials, which are used as electrodes and active layers in stretchable sensors, transistors, multiplexed arrays, displays, and bio-integrated circuits.
