A firefighter is a rescuer extensively trained in firefighting, primarily to extinguish hazardous fires that threaten life, property and the environment as well as to rescue people and animals from dangerous situations.. The complexity of modern, industrialized life has created an increase in the skills needed in firefighting technology. The fire service, also known in some countries as the ...

Firefighter - Wikipedia

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user (i.e., no escape route, smoke, explosion hazard, etc.), or otherwise requires the expertise of a fire brigade.

Words: Lucie Ponting The fire alarm sounds, you leave your workstation and stand in a car park for 20 minutes; someone takes a roll call and you file back inside. For many organisations, this type of exercise goes on unquestioned year in, year out. The fire drill box has been ticked but no one has asked what has been learned, how much it has cost the business, and, more
