The geometric algebra (GA) of a vector space is an algebra over a field, noted for its multiplication operation called the geometric product on a space of elements called multivectors, which is a superset of both the scalars and the vector space .Mathematically, a geometric algebra may be defined as the Clifford algebra of a vector space with a quadratic form.

54 INTRODUCTION TO MATRIX ALGEBRA On occasion, we shall refer explicitly to the elements of a matrix (i.e., the numbers or random variables in the array). In this case, we use the following notation to indicate that  $A$  is a matrix with elements  $a_{ij}$ .

In mathematics, an algebra over a field (often simply called an algebra) is a vector space equipped with a bilinear product. Thus, an algebra is an algebraic structure, which consists of a set, together with operations of multiplication, addition, and scalar multiplication by elements of the underlying field, and satisfies the axioms implied by "vector space" and "bilinear".
