Any energy crisis in the near future will hinder President Bush's efforts to stimulate the economy through tax cuts and other fiscal measures. An energy crisis could cause a recession, inflation, and higher unemployment.

The Coming Energy Crisis? - WTRG

The term "energy crisis" is used quite loosely so it pays to be clear about what's under discussion. Broadly speaking the term poses three distinct questions: Will we run out of energy? We rely on coal, oil and gas (the fossil fuels) for over 80% of our current energy needs – a situation which shows little sign of changing over the medium-term without drastic policy changes.

The Energy Crisis and Climate Change – Global Economic

This uneven distribution of consumption and production is the one cause of energy crisis. Other three causes behind the global energy crisis include surge in demand, tighter supply, political uncertainty in oil producing countries and lack of the diversity of resources.
