In computer science, an interpreter is a computer program that directly executes, i.e. performs, instructions written in a programming or scripting language, without requiring them previously to have been compiled into a machine language program. An interpreter generally uses one of the following strategies for program execution: parse the source code and perform its behavior directly;

### **Interpreter (computing) - Wikipedia**

If one or more of these apply to you, please read on because you are in the right place and there's help for you here.. The families that use my science program typically possess expertise in a wide variety of trades and industry, from computer programmers and doctors to grocery store managers and hair dressers.

A virtual learning environment (VLE) is a system that creates an environment designed to facilitate teachers' management of educational courses for their students, especially a system using computer hardware and software, which involves distance learning. In North America, a virtual learning environment is often referred to as a "learning management system" (LMS).
