### **SUSTAINABLE SOIL MANAGEMENT: Key to food security and**

Soil is a mixture of organic matter, minerals, gases, liquids, and organisms that together support life. Earth's body of soil is the pedosphere, which has four important functions: it is a medium for plant growth; it is a means of water storage, supply and purification; it is a modifier of Earth's atmosphere; it is a habitat for organisms; all of which, in turn, modify the soil.

Biodynamic agriculture is a form of alternative agriculture very similar to organic farming, but it includes various esoteric concepts drawn from the ideas of Rudolf Steiner (1861–1925). Initially developed in 1924, it was the first of the organic agriculture movements. It treats soil fertility, plant growth, and livestock care as ecologically interrelated tasks, emphasizing spiritual and ...

Considerations for restoring temperate forests of tomorrow: forest restoration, assisted migration, and bioengineering.. This 2015 paper by Dumroese et al. sorts through the plethora of terms in conservation biology, forestry, and restoration ecology that refer to new management tools for climate adaptation.

## Assisted Migration (Assisted Colonization, Managed

This section introduces a range of climate-smart agriculture (CSA) practices and technologies within seven entry points for CSA; soil management, crop management, water management, livestock management, forestry, fisheries and aquaculture, and energy management. Practices are understood broadly as ways of doing things, for example, precision farming, tillage, and fertilization; these are all ...

Environmental Awareness - Naturalist Intelligence Environment is the area in which we live and share. The thin layer of air that surrounds our planet that supports life. Humans are the only kind of life that we know of that exists in our universe. If we did not have our environment we could not exist.

Le biochar est un amendement agricole issu de la pyrolyse de biomasse. Son utilisation présente de nombreux avantages, parmi lesquels la humification des sols, l'amélioration de la rétention d'eau et la stimulation du système immunitaire des plantes. Il en résulte une augmentation significative de la productivité des sols.
