Random variables. A random variable is a variable whose value depends on the outcome of a probabilistic experiment. Its value is a priori unknown, but it becomes known once the outcome of the experiment is realized.

Spectrum of a bounded operator Definition. Let T be a bounded linear operator acting on a Banach space over the scalar field \mathbb{K} , and let I be the identity operator on X . The spectrum of T is the set of all $\lambda \in \mathbb{K}$ for which the operator $T - \lambda I$ does not have an inverse that is a bounded linear operator. Since $T - \lambda I$ is a linear operator, the inverse is linear if it exists; and, by the bounded inverse theorem, it is ...

1. Introduction. Methane is an energy carrier of significant importance to the industry, energy, and transportation sectors worldwide. Its existing distribution infrastructure in many countries makes it a constitutive element of modern economies.

Ecology (from Greek: $\epsilon\kappa\omicron\lambda\omicron\gamma\iota\alpha$, "house", or "environment"; $\sigma\upsilon\lambda\lambda\omicron\gamma\eta$, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...
