The central proposition of evolutionary psychologyâ€”that human beings retain the mentality of their Stone Age forebearsâ€”gathers its strength from six convergent sources of scientific research.

How Hardwired Is Human Behavior? - hbr.org

Instinct or innate behavior is the inherent inclination of a living organism towards a particular complex behavior. The simplest example of an instinctive behavior is a fixed action pattern (FAP), in which a very short to medium length sequence of actions, without variation, are carried out in response to a corresponding clearly defined stimulus.

The Language Instinct is a 1994 book by Steven Pinker, written for a general audience. Pinker argues that humans are born with an innate capacity for language. He deals sympathetically with Noam Chomsky's claim that all human language shows evidence of a universal grammar, but dissents from Chomsky's skepticism that evolutionary theory can explain the human language instinct.

Ethology, the study of animal behaviour. Although many naturalists have studied aspects of animal behaviour through the centuries, the modern science of ethology is usually considered to have arisen as a discrete discipline with the work in the 1920s of biologists Nikolaas Tinbergen of the Netherlands and Konrad Lorenz of Austria. Ethology is a combination of laboratory and field science, with ...
