David Jeffrey Griffiths (born 1942) is a U.S. physicist and educator. He worked at Reed College from 1978 through 2009, becoming the Howard Vollum Professor of Science before his retirement. He is not to be confused with the late physicist David J. Griffiths (David John Griffiths) of Oregon State University.

David J. Griffiths - Wikipedia

Classical electromagnetism or classical electrodynamics is a branch of theoretical physics that studies the interactions between electric charges and currents using an extension of the classical Newtonian model. The theory provides a description of electromagnetic phenomena whenever the relevant length scales and field strengths are large enough that quantum mechanical effects are negligible.

OF MOVING BODIES By A. Einstein June 30, 1905. It is known that Maxwell's electrodynamics "as usually understood at the present time" when applied to moving bodies, leads to asymmetries which do not appear to be inherent in the phenomena.

Descrizione. La legge di Faraday descrive il manifestarsi di due fenomeni distinti: la forza elettromotrice dovuta alla forza di Lorentz che si manifesta a causa del moto di una spira in un campo magnetico, e la forza elettromotrice causata dal campo elettrico generato dalla variazione di flusso del campo magnetico, in accordo con le equazioni di Maxwell.
